

# ANURAJ VALLIYIL

Test Architect | 13+ Years in QA & Test Automation | AI-Driven Testing Specialist

 anurajvalliyl@gmail.com  +91-9495849745  Kottayam, Kerala, India  anurajvalliyl.github.io

## PROFESSIONAL SUMMARY

Results-driven QA leader with 13+ years of progressive experience spanning manual testing, advanced automation engineering, and AI-driven test strategies. Proven track record architecting scalable test frameworks covering 10,000+ test cases across Web, Mobile, API, and Performance layers. Expert in integrating AI/ML-based testing using MCP (Model Context Protocol), LLM-assisted test generation, and intelligent defect prediction. Hands-on with CI/CD pipelines, DevSecOps, and security testing. Successfully delivered quality for 20+ enterprise products across HealthTech, FinTech, EdTech, Travel (GDS), IoT, and Blockchain domains.

## KEY ACHIEVEMENTS & IMPACT

- Architected an AI-driven test automation framework leveraging MCP (Model Context Protocol) for autonomous test generation, reducing manual test authoring effort by 60%.
- Built and scaled test suites from 0 to 10,000+ test cases across 8+ concurrent enterprise projects using Selenium Java, Cypress, Appium, and Katalon Studio.
- Reduced regression cycle time from 3 days to 4 hours by implementing parallel execution in CI/CD pipelines (Jenkins, GitHub Actions) with Docker containerization.
- Implemented performance testing using JMeter for 5+ applications, identifying and resolving bottlenecks that improved system throughput by 40% under peak load.
- Led API automation initiative across 12+ microservices using Postman/Newman and REST-Assured, achieving 95%+ API test coverage.
- Delivered security scanning (MobSF, OWASP ZAP, ImmunityWeb) for 10+ mobile/web apps, reducing critical vulnerabilities pre-production by 70%.
- Received Excellence Award (Q4 2020) and Spot Award (Oct 2020) at Experion Technologies for independent testing service framework and DevOps testing practice.

## PROFESSIONAL EXPERIENCE

**Test Architect** | **Experion Technologies Pvt Ltd, Trivandrum** | *Feb 2020 – Present* | Kerala, India

- Lead a team of 10+ QA engineers across multiple concurrent projects; manage resource allocation, test planning, and daily sprint reporting in Agile-Scrum environments.
- Pioneer AI-driven test automation using MCP (Model Context Protocol) for LLM-assisted test case generation and intelligent defect triage, cutting test creation time by 60%.
- Design and implement end-to-end automation frameworks from scratch for Web (Selenium/Cypress), Mobile (Appium), API (Postman/Newman), and Performance (JMeter) — scaling to 10,000+ test cases per project.
- Architect scalable Page Object Model (POM) and BDD/Cucumber-based frameworks with data-driven and keyword-driven capabilities; integrated with Jenkins CI/CD and Docker.
- Conduct basic DAST security assessments using OWASP ZAP, MobSF, and ImmunityWeb on 10+ applications prior to production release.
- Author and present automation proposals, RFPs, and estimation documents for prospective clients; deliver client demos for Jira Xray, automation tooling, and DevOps pipelines.
- Participate in ISO 9001:2015 and ISMS ISO 27001 internal/external audits; champion quality processes across the organization.
- Mentor and upskill 15+ team members in automation best practices, framework design, and AI-augmented testing techniques.
- Serve on Manual + Automation QA Interview Panel; evaluate technical competencies for hiring.

**Software QA Team Lead** | **Uvionics Tech Pte Ltd, Koratty Thrissur** | *Oct 2018 – Jan 2020* | Kerala, India

- Led QA team of 5 for IoT and Connected Living products (ConnectedLife Health & Smart Home platforms).
- Established testing processes, traceability matrices, and regression suites from scratch; coordinated cross-functional testing with hardware and software teams.

- Executed end-to-end functional, integration, and UAT for mobile apps (iOS/Android) and admin web dashboards.

#### **Quality Analyst** | MWT Technologies Pvt Ltd, Infopark Kochi | Oct 2015 – Oct 2018 | Kerala, India

- Delivered QA for healthcare and education platforms across Australian and Middle East markets (IHNA, Knowledge Hub ERP, Health Careers Group).
- Created 3,000+ test cases in TestLink and RTH; performed regression, smoke, and UAT cycles.
- Collaborated with offshore development teams to resolve defects and improve requirement clarity.

#### **Software Testing Engineer** | Nucore Software Solutions, Kozhikode | Feb 2013 – Sep 2015 | Kerala, India

- Performed manual and automated testing for travel industry solutions including TRAACS (Travel Mid & Back Office) — GDS testing across Amadeus, Galileo, Worldspan, and Sabre.
- Tested multi-currency accounting, BSP/LCC reconciliation, auto-invoicing, and AMEX integration modules for Middle East travel agencies.

### **TECHNICAL SKILLS**

---

|                           |                                                                                                                                                 |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>AI / MCP</b>           | MCP (Model Context Protocol), LLM-Assisted Test Generation, AI-Driven Test Automation, Intelligent Defect Prediction, Prompt Engineering for QA |
| <b>Automation</b>         | Selenium Java, Cypress, Appium, Katalon Studio, TestProject, Postman/Newman, REST-Assured, JMeter                                               |
| <b>Frameworks</b>         | Page Object Model (POM), BDD/Cucumber, Data-Driven, Keyword-Driven, Hybrid Frameworks (10,000+ test case scale)                                 |
| <b>Security</b>           | OWASP ZAP, MobSF, ImmunityWeb, DAST, SAST basics                                                                                                |
| <b>CI/CD &amp; DevOps</b> | Jenkins, GitHub Actions, Travis CI, Docker, Git/SVN                                                                                             |
| <b>Programming</b>        | Java, Python, JavaScript, Groovy, HTML                                                                                                          |
| <b>Management</b>         | Jira, Jira Xray, Confluence, Basecamp, Redmine, TestLink, RTH, Knowledge Tree                                                                   |
| <b>Databases</b>          | MS SQL Server, MySQL, PostgreSQL, Oracle DB                                                                                                     |
| <b>Platforms</b>          | Web, iOS, Android, Huawei, Windows, Linux, macOS                                                                                                |
| <b>Methodologies</b>      | Agile/Scrum, Waterfall, SDLC, STLC, Risk-Based Testing                                                                                          |
| <b>Standards</b>          | ISO 9001:2015, ISMS ISO 27001                                                                                                                   |

### **DOMAIN EXPERTISE**

---

HealthTech / MedTech • EdTech • Travel & GDS (Amadeus, Galileo, Worldspan, Sabre) • Banking & Finance • E-Commerce • IoT / Smart Home • Artificial Intelligence • Blockchain • ERP Systems

### **NOTABLE PROJECTS**

---

#### **Bounce (Preschool Management Platform)** | Angular, Node.js, Android, iOS

- Built mobile automation suite (Appium) covering 800+ test cases; integrated with CI/CD for nightly regression runs.

#### **CLIFIT – AI Cardiac & Health Monitoring** | Python, R, Angular, Java, React

- QA lead for AI-powered preventive care solution monitoring cardiac, glucose, SpO2, BP — validated ML model outputs, sensor data accuracy, and HIPAA-aligned data flows.

#### **TRAACS – Travel Mid & Back Office** | GDS: Amadeus, Galileo, Worldspan, Sabre

- End-to-end testing of multi-currency accounting, BSP/LCC reconciliation, ticketing, and AMEX integration for Middle East travel agencies.

#### **ConnectedLife Health & Smart Home (IoT)**

- Validated INR/blood coagulation wireless monitoring device, smartphone app, and web admin dashboard for remote patient monitoring — tested BLE connectivity, data sync accuracy, and alert thresholds.

#### **IHNA / Academic Hub (Healthcare Education ERP)** | Australia

- QA for admissions portal, student hub, and backend ERP; designed 2,500+ test cases covering enrollment workflows, compliance, and multi-campus operations.

## EDUCATION

---

B.Tech – Computer Science Engineering

University College of Engineering, Muttom,  
Thodupuzha | 2008–2012 | 66.53%

Higher Secondary – Biology Science (85%)

St Augustine's HSS, Ramapuram, Kottayam |  
2006–2007

## AWARDS & RECOGNITION

---

- Excellence Award – Experion Technologies (Jan 2021): Certificate of Excellence for contributions to organizational goals, Q4 2020.
- Spot Award – Experion Technologies (Oct 2020): Recognition for independent testing service framework, DevOps testing practice, and API automation implementation across projects.

## CERTIFICATIONS & TRAINING

---

Selenium WebDriver with Java (Advanced) • API Testing with Postman • Agile Scrum Foundation • OWASP Mobile Security Testing • Jira Xray Certified User
